

Ethics and Ethical Standards

The journal Socles publishes original articles and evaluated anonymously. It provides readers with scientifically recognized texts.

This Ethics and Ethics Guide is an agreement that aims to explain the responsibilities of each party involved in the process of evaluating / publishing articles.

1 - Responsibility of the publisher

Publication Decisions: Copyright and quotations from scientific literature must be respected in order to preserve the rights of others when publishing articles. The publisher is responsible for the publication decision by verifying compliance with the legal requirements for publication, particularly the issues of defamation, copyright infringement, or piracy. The editor-in-chief may also consult the editorial committee or the experts to make a final decision.

Integrity: The publisher ensures that the content of each article is evaluated, regardless of gender, origin, religious beliefs, citizenship, or political affiliation of the author.

Confidentiality: Information about the authors should be highly confidential and should not be disclosed by those involved in the publication process that has had access to it.

Explicit Consent: The results of research, from articles not accepted for publication, may not be used or used without the written permission or permission of the author.

2. The responsibility of the evaluator

Contribute to the publication decision: The evaluator is responsible for assisting the chief editor and the editorial board in making the publication decision. It must also help the author, through his explicit and logical remarks, to improve his article and to correct it.

Respect of deadlines: The evaluator must evaluate articles submitted to him in a timely manner. In the event that the submitted article does not fall within its competence or falls outside its field, it must promptly inform the chief editor of the journal.

The evaluator must also inform the publisher that the evaluation may be delayed due to lack of time or lack of sufficient resources for the evaluation and for the smooth running of the publication process.

Confidentiality: The evaluator preserves the confidentiality of the information contained in the article and can not disclose or discuss what is said there with a party other than that authorized by the publisher.

Objectivity: The evaluator must perform an evaluation based on recognized requirements in the area of research inherent in the field of inscription of the article or other area that it considers relevant. He will advance arguments and objective evidence and avoid arbitration on the basis of his personal, racial, sectarian, and other opinions.

Select sources: The evaluator should attempt to identify sources and references to topics that the author did not mention. Any passages from other previously published works must be correctly cited and referenced. The evaluator must inform the publisher and warn him of any similar work with the work being evaluated.

Conflict of interest: The appraiser should not base his or her assessment on personal interests and his / her work will not be done to resolve conflicts.

3 - Liability of the author

Criteria for preparation: The author must submit original research and present it accurately and

Objectively, scientifically, consistently, and in accordance with the characteristics of the articles, whether in terms of language, form or content, in accordance with the standards and publication policies of the journal. He must present the data correctly through a complete reference and taking into account the rights of others in the article. It will avoid showing sensitive, immoral, personal, ethnic, doctrinal, counterfeit, and inaccurate information or translating the work of others without mentioning the source of the quote in the article.

Originality and piracy: The author must prove the originality of his work and any quotation or use of paragraphs or words of others must be quoted in a complete and correct manner. The journal reserves the right to use piracy detection programs for texts submitted for

publication.

Republication: The author cannot submit the same work (article) to more than one journal; it is regarded as immoral and unacceptable behavior.

Access and Retention of Data: The author must retain the private data used in his article and

submit Them, as requested, to the publisher or evaluator.

Authors of the article: The authors of the article should be limited to the number of actual authors of the article. If it is necessary, it is possible to mention the author responsible for the article, the one who had an important role in the preparation of the article. The author of the article must ensure that the names and information of all authors are present and that no other author's name is included unless he or she has actually participated in the writing of the article.

Bibliography and references: The author of the article is obliged to indicate references in an appropriate manner, and the text must include all books, publications, websites and other research in the list of references cited or mentioned in the text of the article.

Report errors: If the author becomes aware of the existence of a fundamental error or inaccurate details in his article, he must immediately, and at all times, notify the editor of the journal or the

Publisher and cooperate with him to correct the error.

4 - Copyright

All content of the article is protected by copyright and cannot be reproduced because the publisher holds the copyright of the entire published product.

Disclaimer: Changes to publications may be made at any time, as needed. The journal is non-commercial and does not charge fees for evaluation, acceptance of publication and printing. When an article is accepted, the copyright is automatically transferred to the journal.

Open Access Policy: All articles published by the journal Socles are freely and permanently consulted online as soon as they are published.
