

PhytoChem & BioSub Journal

Peer-reviewed research journal on Phytochemistry & Bioactives Substances

ISSN 2170 - 1768

PCBS Journal

Volume 9 N° 1, 2 & 3

2015

PhytoChem & BioSub Journal (PCBS Journal) is a peer-reviewed research journal published by Phytochemistry & Organic Synthesis Laboratory. The PCBS Journal publishes innovative research papers, reviews, mini-reviews, short communications and technical notes that contribute significantly to further the scientific knowledge related to the field of Phytochemistry & Bioactives Substances (Medicinal Plants, Ethnopharmacology, Pharmacognosy, Phytochemistry, Natural products, Analytical Chemistry, Organic Synthesis, Medicinal Chemistry, Pharmaceutical Chemistry, Biochemistry, Computational Chemistry, Molecular Drug Design, Pharmaceutical Analysis, Pharmacy Practice, Quality Assurance, Microbiology, Bioactivity and Biotechnology of Pharmaceutical Interest)

It is essential that manuscripts submitted to PCBS Journal are subject to rapid peer review and are not previously published or under consideration for publication in another journal. Contributions in all areas at the interface of Chemistry, Pharmacy, Medicine and Biology are welcomed.

Editor in Chief

Guidelines for the publication of manuscripts in PhytoChem & BioSub Journal (ISSN 2170 – 1768)

PhytoChem & BioSub Journal (PCBS Journal) is a periodical dedicated to the publication of original scientific work, reviews, and communications in the field of Phytochemistry & Bioactives Substances. Contributions in all areas at the interface of Chemistry, Pharmacy, Medicine and Biology are welcomed.

Submission of an article to the **PCBS Journal** implies that the work described has not been published previously (except in the form of an abstract or as part of a published lecture or academic thesis), that it is not under consideration for publication elsewhere, that its publication is approved by all authors.

The **PCBS Journal** reserves the right to submit all received manuscripts to *ad hoc* referees, whose names will be kept confidential, and will have the authority to decide on the pertinence for acceptance. Referees may send back manuscripts to Editor-in-Chief, for transmission to the author(s) with suggestions for necessary alterations, which are to be made in order to conform to the standards and editorial rules of the Journal. All manuscripts should be prepared in MS-Word format, and submitted online to **Phytochem07@yahoo.fr**. Upon receipt of paper submission, the Editor sends an E-mail of confirmation to the corresponding author within 1-4 working days. The Editors reserve the right to edit or otherwise alter all contributions, but authors will receive proofs for approval before publication. If you have any questions, please contact with the editor of the journal at the same E mail

The manuscript should be on A4 size paper, double spaced using Times New Roman size 12 font, fully justified, with margins of 2 cm and should be arranged in the following order:

Title: Concise and informative, in accordance with the contents of the article. (Times New Roman; Size: 14, Blod.)

Author's names and affiliations: Please indicate the given name and family name clearly (Times New Roman; Size-12; Italic). Present the authors' affiliation addresses below the names (Times New Roman; Size-11; Italic). Provide the full postal address of each affiliation, including the country name, and, if available, the e-mail address, and telephone number of each author.

Abstract: A concise and factual abstract is required with 200 or less words highlighting the most important information, including the methodology, results, and conclusions that allows readers to evaluate their interest in the article and thus avoiding the reading of the full work (Times New Roman; Size-12; Italic).

Keywords: Immediately after the abstract, provide a maximum of 7 keywords, avoiding general and plural terms and multiple concepts (Times New Roman; Size-12; Italic).

Introduction: Should clearly establish the objectives of the work and its relationship with other works in the same field

Material and Methods: Description of the Material and the Methods used should be brief, and clear enough to make possible the comprehension and the reproducibility of the work.

Results and Discussion: Should be presented with a personal discussion or interpretation, and whenever possible, be accompanied by adequate tables and figures and the discussion must be restricted to the significance of the data presented. Figures, Tables and Structural Formulas are included in the text.

Acknowledgements: (optional item)

References: Should be standardized to conform to the requirements of the journal. Preferentially use references that can be accessed by the readers worldwide.

EDITORIAL

The Pollution Of Science: Plagiarism & Predatory Journal

Abdelkrim CHERITI

*Phytochemistry & Organic Synthesis Laboratory
University of Bechar, 08000, Algeria*

Received: June 19, 2015; Accepted: August 12, 2015

We have already noted in a previous editorial that plagiarism is a form of violation copyright, an illegal practice and is considered misconduct research, unethical, perturb and damage the integrity and knowledge of the scientific community. Plagiarism (copy – past) affects all disciplines of sciences and became prevalent in the era of new technologies of communication. Unfortunately these unhealthy and dishonest practices are encouraged by predatory and none reviewed online journals, closing their eyes on plagiarism to "fill" the pages of journals and make a few dollars.

In 2013 we denounced a case of plagiarism, a stupid copy and paste of our article published since 2012 in this journal (PhytoChem & BioSub Journal Vol. 6 N° 2, 83-87, 2012) by another “ scientists” - teaching in Tlemcen and Bechar universities, L. Ziane, H. A. Lazouni, A. Moussaoui, N. Hamidi - and published in Asian Journal of Natural & Applied Sciences, Vol. 2(1), 5-9, 2013 ([www. leena-luna.co.jp](http://www.leena-luna.co.jp)). A journal with editorial board but the editor chief is anonymous.

Due to the complicity of university administrators and predatory journal, the same "authors" return to their unhealthy and disastrous practices. Ziane and al publish an article entitled “flavonoid from methanolic extract of limoniastrum feei (girard) batt (plumbaginaceae)” in *Asian journal of Pharmaceutical and Clinical Research* , Vol 8, Issue 2, 2015, 218-219 (*innovare academics, India*).

The article is an integral copy and paste of our works published since 2010 in Phyto Chem & BioSub Journal Vol. 4 N° 2, 2010 (<http://pcbsj.webs.com/pcbs-j-vol-4-3-2010-2009>), with slightly modification of title and introduction. Unfortunately the editor in chief of this journal (Dr Sharad Jain) made no action or sanctions against this proved stupid plagiarism, it is clear that matching an integral article (Copy and paste) from another scientific journal is a potential plagiarism qualified unjustified attitude, stupid practice and illustrates the potential dangers of the online diffusion of predatory journal.

I think, any one, authors or publisher not condemn and promote these practices should be automatically disqualified from scientific research. The responsibility of editor against plagiarism must be engaged, at least by the retracted of article in question.
