

# Journal of Applied Engineering Science & Technology, JAEST

---

---

**A new 4-node quadrilateral element based on layerwise approach for free vibration analysis of laminate-faced sandwich plates**

*M.O. Belarbi, A. Tati, A. Khechaj, H. Ounis*

---

**Effect of a partial saturation on the hydromechanical response of a clay rock**

*P. Delage, H. Menaceur, M. Belmokhtar, J. Talandier*

---

**On the characterization of sandwich panels for solar flat plate collectors' applications: theoretical and experimental investigation**

*H. Djemai, M. Hecini, A. Labed*

---

**Thermal design of air cooled condenser of a solar adsorption refrigerator**

*A. Rouag, A. Benchabane, A. Labed, N. Boultif*

---

**Numerical study of a vertical pullout capacity of strip anchor plate on a frictional soil**

*H. Mokhbi, M. Mellas, A. Mabrouki, J.M. Pereira*

---

**Study of the microstructure of collapsible soil treated with the potassium chloride**

*O. Bahloul, K. Abbeche, A. Bahloul*

---

**Numerical study of seismic earth pressures acting against a vertical retaining wall in frictional soil**

*S. Zerguine, D. Benmeddour, A. Zatar*

---
