Editorial

The "Recueil de mécanique" is an international, peer-reviewed journal. It is edited by the mechanical engineering research team of El-Wancharissi University Center and other national and international academic institutions. It is dedicated to research works of experienced and confirmed researchers.

The periodic covers a significant number of thematic. For illustration and not limited to the following topics are treated:

- power plants (conventional and hybrid, stationary and on board);
- thermal science;
- thermodynamics;
- fluid mechanics;
- mathematical modeling of systems and processes;
- renewable energy (solar, wind, geothermal, tidal powered, etc ...) processes and technologies;
- mechanical contacts and tribology;
- machines dynamics, vibration, acoustic and maintenance;
- engineering;
- aerospace engineering;
- automotive engineering;
- computational mechanics;
- industrial and manufacturing engineering;
- mechanical engineering;
- ...etc.

In addition to original articles, the journal is also dedicating special issues to seminars and colloquium works.

Since the vol.3 n°1 the journal operates a double blind review process. All contributions will be initially assessed by the editor for suitability for the journal. Papers deemed suitable are then typically sent by the editor or the associated editors to a minimum of two independent expert reviewers to assess the scientific quality of the paper. The Editor is responsible for the final decision regarding acceptance or rejection of articles.

RDM is an open access journal which means that all content is freely available without charge. Users are allowed to read, download, copy, distribute, print, search, or link to the full texts of the articles in this journal without asking prior permission from the publisher or the author. RDM is indexed in DOAJ Sherpa/Romeo, ULRICHS and Copernicus databases.
