Presentation

“Nature and Technology Review” (NATEC) is a multidisciplinary scientific journal published by Hassiba Benbouali University of Chlef (Algeria) since June 2009. NATEC publishes, in English and French, original research articles and review articles, which cover a wide spectrum of theoretical and experimental work at universities and other national, regional and international research organizations.

The fields covered by NATEC are divided into 3 categories:

- Category A: Fundamental Sciences and Engineering
- Category B: Agronomic and Biological Sciences
- Category C: Environmental Sciences.

NATEC adheres to the ethical guidelines for research and publication of [COPE](#) as described in [Guidelines on Good Publication](#).

NATEC has an international reviewing committee and senior researchers with established competence in their fields.

The submission is exclusively via electronic way through the Algerian Scientific Journal Platform (ASJP): <https://www.asjp.cerist.dz/en/PresentationRevue/47>

All articles submitted to NATEC are subject to a rigorous double-blind peer-to-peer review by at least two referees in the field of the submitted work.

What is considered in the evaluation are originality; accuracy; reproducibility; validity and language.

Possible decisions reserved for an article include acceptance, revision or rejection. If an author is encouraged to revise his or her article, there is no guarantee that the revised version will be published. The decision to reject an article is final.

During the entire evaluation process, the Editorial Board guarantees the anonymity of the referees and authors. Articles are submitted to the experts anonymously. The evaluation sheets sent to the authors are also anonymous.

All members of the Reviewing Committee and Editorial Board are under the obligation of confidentiality of the articles. They are strictly forbidden to divulge the content, in whole or in part, even the abstract, of articles under review by the journal. This prohibition remains valid even for articles that have been definitively rejected.

The submission, evaluation and publication of accepted articles are totally free. The publication is in Open Access under the terms of the BY license of [Creative Commons Attributions 4.0 International](#) which allows to share, copy, reproduce, distribute, communicate, reuse or adapt the published work with the obligation to credit its author.

Acceptance of the manuscript is limited by the legal requirements that will be in effect at the time regarding law, copyright infringement and plagiarism.

"Nature and Technology Journal" is indexed in the following databases: [ASJP](#) ; [ProQuest](#) ; [EBSCO](#) ; [Worlcat](#) ; [Index Copnicus](#) ; [ResearchBib](#) ; [DRJI](#) ; [SJIF](#) ; [MIAR](#) ; [WebReview](#) ; [GIF](#) ; [CiteFactor](#) ; [DFAJ](#) ; [ACNP](#) et [Mirabel](#).
