On behalf of the Editorial Board, I am delighted to announce the launch of Volume 5, Issue 11 with a series of new original research papers on food chemistry, diet patterns, and supplementations, articles addressing recent advances related to Nutrition and Food Science. "*The North African Journal of Food and Nutrition Research (NAJFNR)*" is an open access and international peer-reviewed journal, which publishes original (not previously published) work of exceptional quality and interest and which intends to give a wide-ranging coverage of research, views, and reviews on nutrition and its effects in relation to human health and disease. The *NAJFNR* will include all nutrition field research in humans and various disease model organisms and will be of interest to the basic researcher as well as to physicians, scientists, and clinicians.

Sixteen (16) main specialties are involved:

- Food Composition and Dietary Intake Assessment;
- Epidemiology, and the Prevalence of Related Disorders such as Obesity, Diabetes, Dyslipidemias, etc.;
- Biochemistry and Cellular Metabolism of Nutrients;
- Dietary Strategies and Nutrition Education;
- Food Security and Challenges;
- Food Behavior and Quality of Life;
- Public Health Policy & Health Economics;
- Nutrition and Cancer;
- Food Chemistry and Engineering;
- Human and Clinical Nutrition;
- Food Processing and Packaging;
- Nutrition, Physical Activity and Sport;
- Infant, Child, and Adolescent Nutrition;
- Nutrition and Immune-regulation;
- Nutrition and Reproduction;
- Food Environment and NCDs;

The *NAJFNR* is published online with an option for open access. All articles will be promptly peer-reviewed by leading experts. We expect *NAJFNR* to attract manuscripts of the highest quality in order to be of the greatest possible benefit to its readers.

In this journal, we offer an opportunity for scientists across various disciplines in human nutrition and metabolism to share their knowledge and expertise with a wider range of audiences. All articles will be accessible without any access boundaries to all internet users worldwide. The journal will certainly be competing head-on with a number of existing subscription-based journals but clearly, there is a niche for this new journal.

The *NAJFNR* is following the International Committee of Medical Journal Editors (ICJME) recommendations <http://www.icmje.org/journals-following-the-icmje-recommendations/#N> and is under the Creative Commons Attribution 4.0 International license (CC BY 4.0).

Table of Content

January - June: 2021: Volume 5: Issue 11. p 1-52

Original Article

Partial substitution of sucrose by non-nutritive sweeteners in sour orange marmalades: effects on quality characteristics and acute postprandial glycemic response in healthy volunteers. 1-9

<https://doi.org/10.51745/najfnr.5.11.1-9>

Belkacem, A., Ellouze, I., & Debbabi, H.

Original Article

Mold Chitosan production using *Ficus microcarpa* fruit. 10-14

<https://doi.org/10.51745/najfnr.5.11.10-14>

Benahmed Djilali, A., Boughellout, H., & Benseddik, A.

Original Article

Micronutrient supplementation among pregnant women in western Algeria 15-22

<https://doi.org/10.51745/najfnr.5.11.15-22>

Bayazid, A., Soum, M., Boumaza O., & Toumi, H.

Original Article

Adherence to the Mediterranean Diet and anthropometric profile of obese Algerian subjects 23-29

<https://doi.org/10.51745/najfnr.5.11.23-29>

Rahal, L. & Ghouini, A.

Original Article

Antioxidant activity and polyphenol composition of *Pistacia terebinthus* fruit from Tessala (Western Algeria) 30-34

<https://doi.org/10.51745/najfnr.5.11.30-34>

Belifa, N., Benhaddou, A.I., Ferkous, H.E., Selka, M.A., Toumi, H., and Achouri, M.Y.

Original Article

Biochemical and microbiological characterization of “Soumbara” from African locust bean (*Parkia biglobosa*) seeds consumed in Abidjan (Côte d’Ivoire) 35-42

<https://doi.org/10.51745/najfnr.5.11.35-42>

Kouame K.A., Bouatenin K.M.J.-P., Coulibaly W.H., & Marcellin D.K.

Original Article

Biological and functional properties of vine leaves 43-52

<https://doi.org/10.51745/najfnr.5.11.43-52>

Benahmed Djilali A., Benseddik A., Boughellout H., Allaf K., & Nabiev M.
