Mission Statement:

The **Algerian Journal of Natural Products** publishes papers, in French and English languages, based on original research that are judged to make a novel and important contribution of all aspects of Plant and Natural Products.

Today, the **Algerian Journal of Natural Products** continues to be a standard-bearer for excellence in the fields of chemistry of the Natural Products, biochemistry and molecular biology.

AJNP Editor-in-Chief Prof. Kamel Belhamel at the Laboratory of Organic Materials, University of Bejaia, says affinity groups make browsing the Journal's extensive collections of research articles, communications and reviews of scientific advances known as reflections more efficient, possibly fostering collaboration among the Journal's contributors. All content is reviewed by [top-scientists](#).

More about AJNP :

- Published quarterly, **Free of charge**
- Content published immediately upon acceptance and accessible online from the website of the Journal:
 - www.ajnp.webs.com
 - www.univ-bejaia.dz/ajnp
- Redacted articles free to all years after publication
- No page limits.
- Free color figures.
- Published by the non-profit [Laboratory of Organic Materials, University of Bejaia, Algeria.](#)
- To underline its commitment to the progress of science, the AJNP offers [teaching tools](#) for educating young scientists

Topics:

Our peer-review is very fast, highly rigorous and it takes just a few days and authors are carried along adequately in all the publication processes. Submission must be well researched, informed and demonstrate familiarity with the relevant literature, concept and theoretical perspective in the area of the study. Papers are solicited from, but not limited to the following topics:

- Chemistry of Bio-active compounds
- Phytochemistry (Isolation, Structure elucidation, Spectroscopic properties)
- Antimicrobial, antiviral, antiparasite activities
- Biopolymers, biocomposites
- Electrochemical process using natural products
- Separation process using natural products
- Pharmacology, toxicology of plant and their active principles
- Pharmaceutical formulations and evaluation of natural products
- Environmental impact and risk assessment
